**The stage is set
for you to shine**

What Former Interns Had to Say

Hsu, Economics Major ★

I interned in Italy at a company that specialized in high-end customizable furniture and interior design. I was able to work on various skills, including cross-cultural communication, project planning and English presentation skills. This experience helped boost my TOEIC score to 990, and I was able to travel to Korea for my first job and attend the local jazz music festival. I think internships can help you acquire hands-on experience and give you an edge as a job candidate.

Tung, Art Major ★

In my senior year I interned at Gain How Printing and rotated through different departments. The training I received in printing and business design was very different from the classes I took at school. I received and accepted a full-time offer at the end of the internship and was able to hit the ground running at my first job.

Huang, Foreign Languages Major ★

I participated in the five-month TIP program in Italy, working at a wine company. My duties covered translation, marketing and international trade. I think internships are a great way for you to learn from your mistakes, allowing you to grow by overcoming adversity. I ventured into Germany after finishing my internship in Italy and spent more than ten hours a day studying German. As a result, I became fluent in English, German and Italian. Back in Taiwan, I was able to secure a job as a product manager at Wistron Corporation with my global experience and my foreign language skills.
